In order for an automobile to run smoothly and efficiently, all systems (motor, transmissions, suspension, battery, tires, climate control, etc.) must be running smoothly in synchronicity with one another. The same is true for churches. There are nine essential systems that your church needs to run smoothly and effectively in its mission to make disciples of Jesus Christ for the transformation of the world. Does your church have all necessary systems in place? Are they all running smoothly and effectively? **Kay Kotan**, who is currently the Director of Congregational Development for the Susquehanna Conference, is also a nationally recognized coach and expert on the Healthy Church Initiative, which has helped thousands of churches begin a turnaround.

This workshop is most effective when a team from your church attends together so many eyes, ears, and perspectives are a part of your tune-up assessment.
